Tarpaulin system for skip handlers

Innovative and efficient in every detail

Load securing – an all-round solution from MEILLER.

The securing of the load in the skip is as essential as the securing of the skip itself on the skip handler. The tarpaulin system for MEILLER skip handlers is the perfect solution for a safe and efficient operation which allows you to secure your load in the skip in accordance with the legal regulations as well as in a simple and practice-oriented way.

Everything from a single source

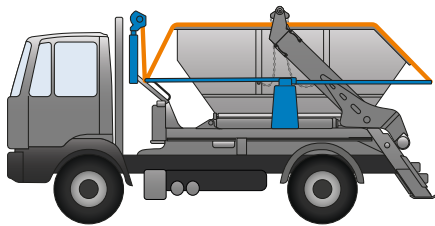

The tarpaulin system matches perfectly with the MEILLER skip handler, allowing the customer to benefit from an integrated solution from one source.

Your benefits

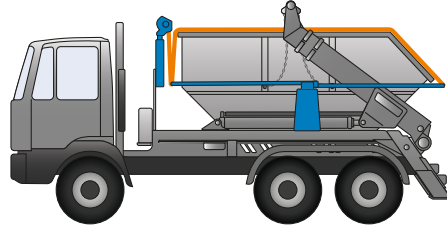

- Safe and convenient working – no potential danger for the driver when securing the load
- Secure transport due to covered load
- High working speed
- Simple operation
- Automatically working system

Tarpaulin programme for skip handler

AK12-MT/MTG

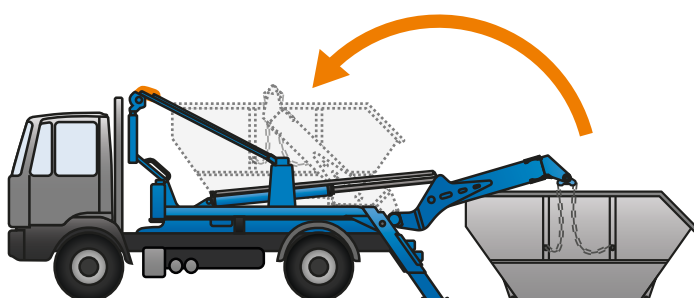

AK16-NT/NTG/MT/MTG

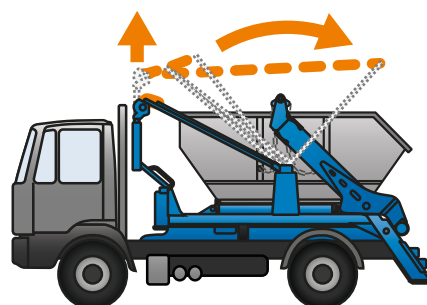

Tarpaulin system retraction

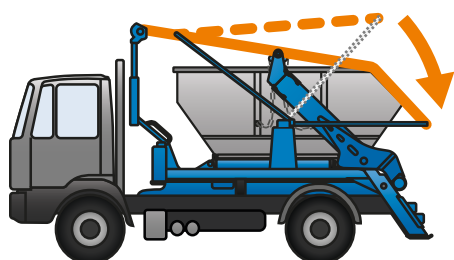

Secure ... quick ... economical.

1. The skip is picked up and secured on the loading area.

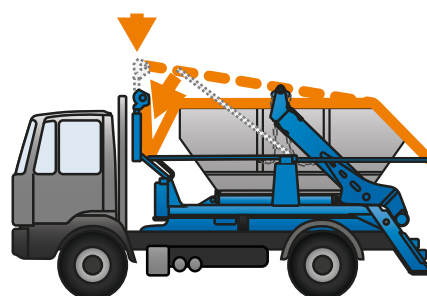

2. The tarpaulin reel with drive motor is lifted from the height-adjustable tower behind the cab.

3. The lifting rods at the rear guide the tarpaulin safely over the entire skip and secure it downwards.

 **Ready to drive within approx. 20 seconds**

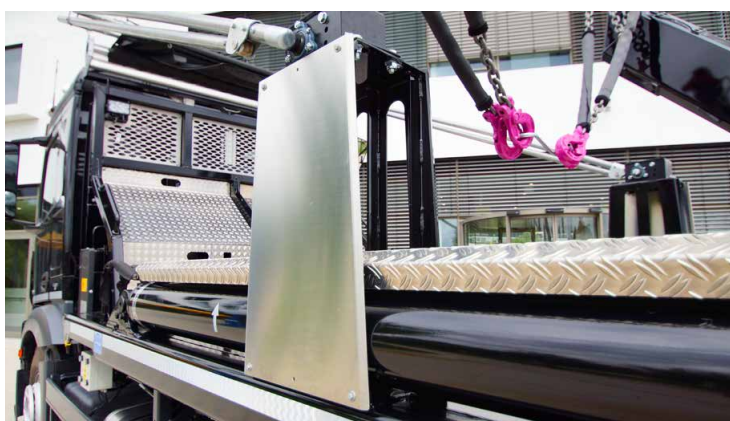

4. The tensioning rods at the front pull the tarpaulin downwards and secure it against airstream.

Features

Control unit – easy operation of all functions

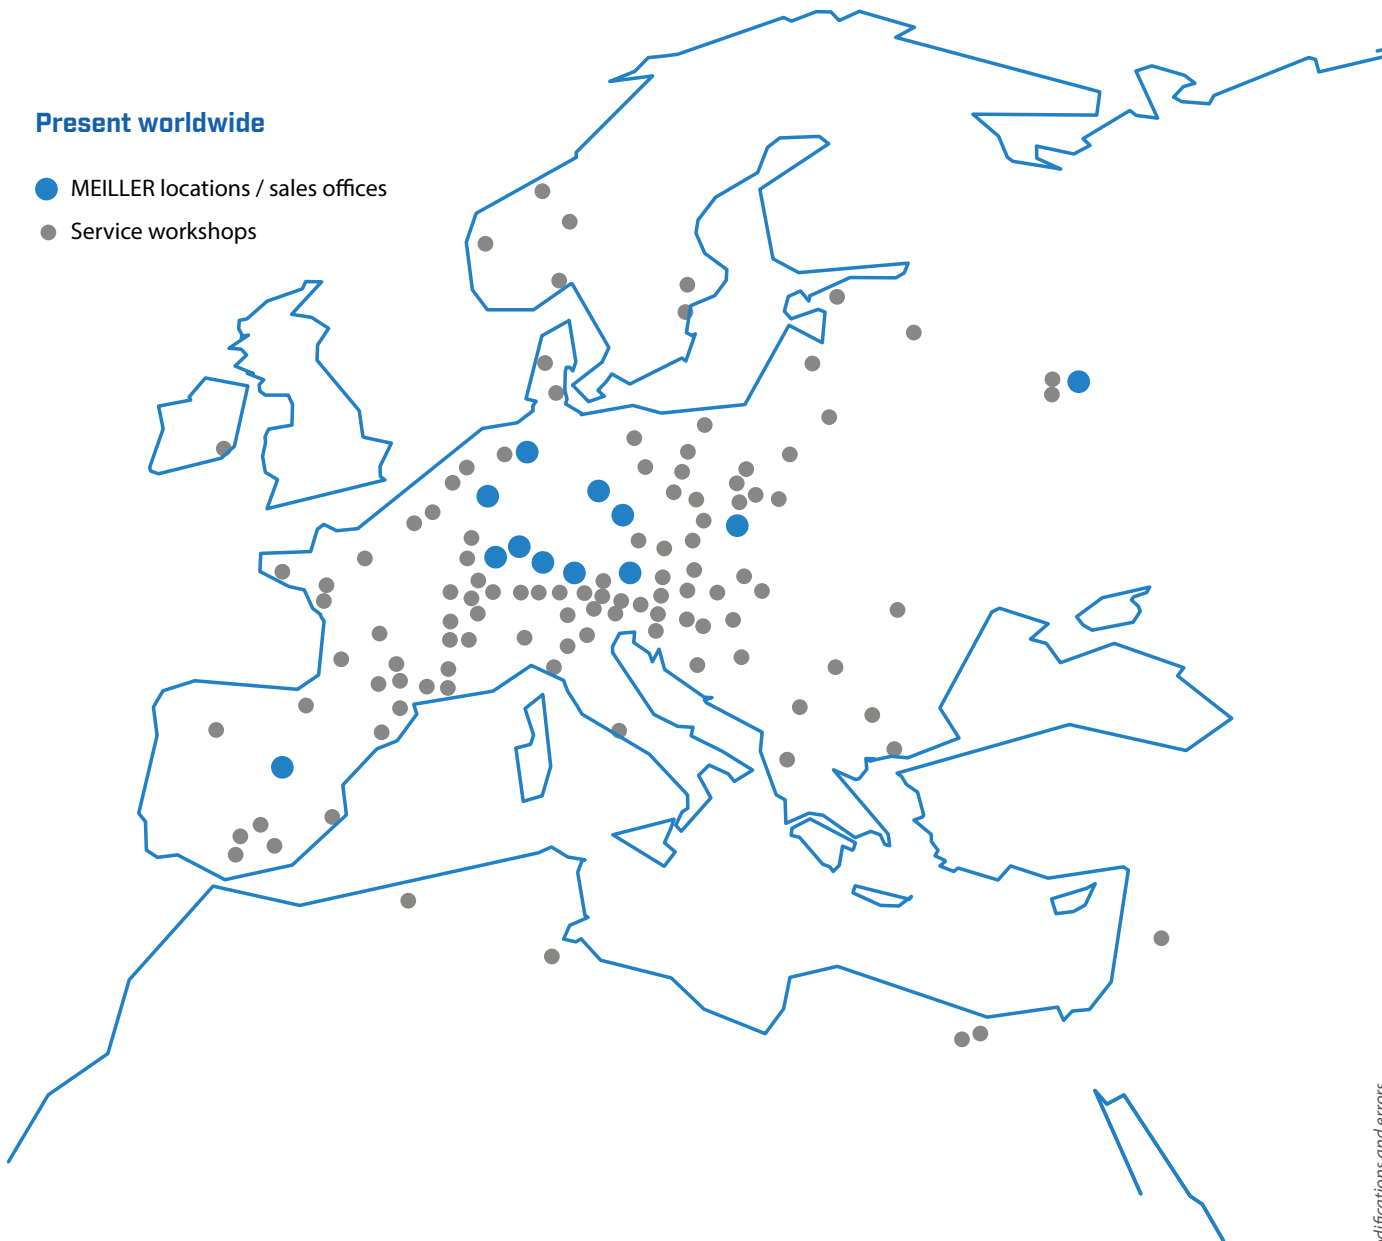

Fixation of the system on the superstructure
